Audience

Healthcare professionals with an interest in epidemiology and public health and improving the health of communities worldwide.

Content Focus

Current Opinion in Epidemiology and Public Health is a literature review journal offering insightful editorials and on-the-mark invited reviews. The journal covers key area of global health medicine and meets the need for exploratory and multidisciplinary research. The journal is for those with an interest in epidemiology and public health and improving the health of communities worldwide. Specifically, those working in the areas of lifestyle, social and environmental epidemiology, and genetic and molecular epidemiology, with emphasis on the science of preventing disease, prolonging life, and improving the health of entire populations through disease and injury prevention, and responses to disease occurrences and health threats in populations.

Editor-in-Chief

Stefania Boccia and Paolo Boffetta
